

CT DEEP Multi-family Stakeholder Roundtables

June 16, 2025, 10:00am to 12:30pm

Via Zoom

Facilitated by Emerald Cities Collaborative

Participant Agenda

Purpose (why we're meeting)

This community engagement session is to discuss opportunities and challenges related to decarbonizing the multifamily building sector.

The listening sessions have invited stakeholders who are engaged with multifamily housing development, operations, and investment to collect feedback that can guide program improvements, resource allocation, equity strategies, and communication efforts across DEEP initiatives, including BETP's programs related to decarbonization and broadband deployment in multifamily buildings.

Desired Outcomes (what we'll accomplish together)

1. Stakeholders will have an opportunity to learn about current DEEP offerings and collaborate on solutions to make them more accessible, effective, and equitable for all.
2. Engagement will inform how existing and future BETP programs can improve equitable outcomes and be responsive to their needs on decarbonizations, resiliency, and renewables in new construction of affordable multifamily housing.

Agenda

10am	Welcome + Context Setting
10:10am	DEEP Program Offerings <ul style="list-style-type: none">- Overview and questions on CT DEEP and BETP new construction programs
